# INTRODUCTION

Enterprise Resource Planning (ERP) is one of the most in **demand management systems** for processing the **routine transactions of a business organization**. It uses ERP software along with **cloud technologies** in processing the inflow of the data. It processes the voluminous data and presents it in the required format for **easy comprehension and decision making process**. It saves a lot of time and manpower and enhances the **productivity of the organization**.

ERP processes the data **seamlessly and keeps it updated regularly**. As the database management system is updated continuously, it makes it more **transparent with the updated data**. The latest data is the most precious thing for people both inside and outside the organization.

GO-ERP

SALES

PRODUCTIVITY

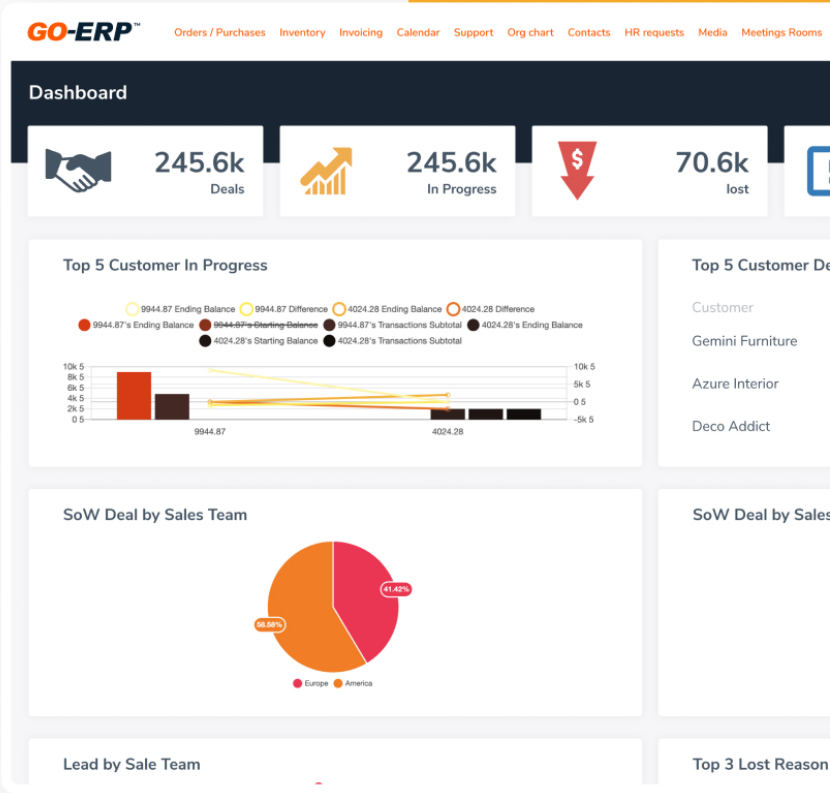

OPERATIONS

## Benefits:

- Effective control over **operational expenditure**
- Minimizing the **administrative expenditure**
- **Seamless workflow**
- **Excellent Analytical data** at finger tips
- Improved **Productivity**
- Excellent **Customer Relations**
- Improved **Collaboration**
- Better **management of risks**
- Strict adherence to **security policies**
- Efficient management of the **resources and employees**
- Excellent **delivery mechanism**

SALES

Analysis of the data is **easy and quick** with the installation of the ERP solutions. Within a few seconds, you can generate the required data in the required format for **analysis and decision making**.

# DASHBOARD

The dashboard is the most vital tool for any business organization to monitor the day to day business operations

## ■ Dashboard Tells Everything

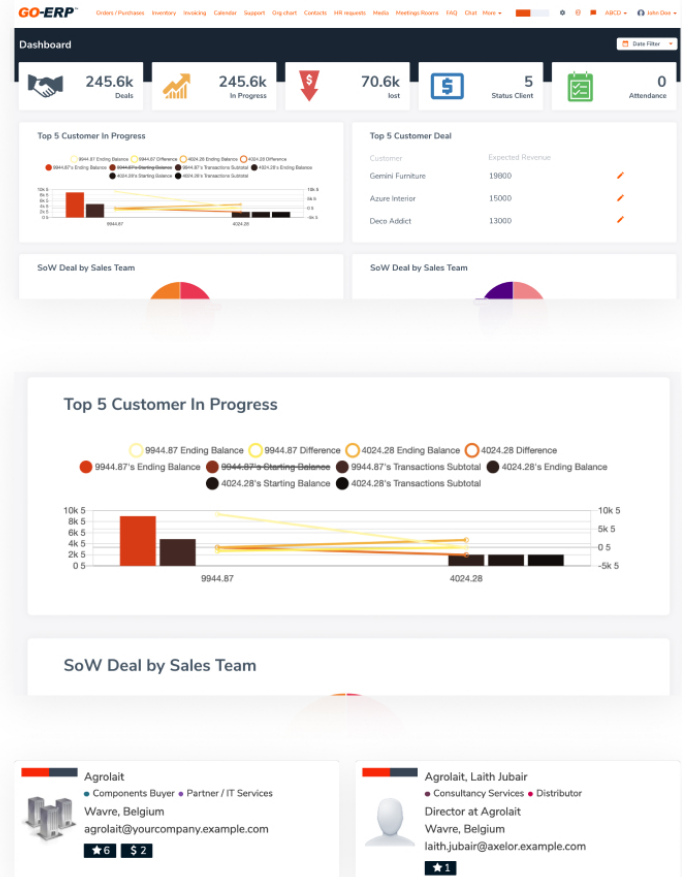

A quick glance at the dashboard reveals many things about the business at any point of time. Visual representation of the data in the form of charts and diagrams makes it easy to understand the complex data. Different types of diagrams and charts like pie charts, vertical bar charts and horizontal bar charts communicate the data effectively.

## ■ Easy Book keeping

Every electronic transaction gets recorded in the accounts books of the firm automatically. You can save a lot of time and money and need not employ any accountant. Thus, it saves manpower and reduces the cost of overheads.

## ■ Convert Quotations into Invoices

The ERP solutions provide multiple features to make your business documentation easy. It generates invoices from the quotations with a mouse click.

# QUOTATIONS/INVOICES

With a little effort, you can easily convert quotations into invoices

## ■ Procedure payment method

Use automated payment systems such as Buckaroo, PayPal, Adyen and Authorize.net. By using default reminders, you no longer have to be distressed with sending reminders and following messages. You are paid without any pressure or delay through the billing system tailored specifically for your use

## ■ Computerized Accounting and record keeping

Get a simplified accounting process that enables you to keep tabs on your invoice drafts, payments and unpaid bills. A simplified and computerized payment system will automatically track all incoming and outgoing financial transactions occurring in your bank account.

## ■ Custom analysis

Review your invoices and sales with bespoke dashboards. Access relevant information and make sales evaluation easily.

The screenshot shows a 'New' quotation form with the following fields and options:

- Buttons at the top: Send by Email, Print, Preview, Confirm Sale, Cancel.
- Navigation tabs: Quotation, Quotation Sent, Sales Order.
- Form fields:
  - Customer: [Dropdown]
  - Order Date: 11/17/2019 14:55:20
  - Quotation Template: Default Template
  - Expiration Date: 12/17/2019
  - Pricelist: [Dropdown]
  - Payment Terms: [Dropdown]
  - Delivery Method: [Dropdown]
- Section: Order lines (Suggested Products, Other Information)
- Table headers: Product, Description, Ordered Qty, Delivered, Invoiced, Unit of Measure, Unit Price, Taxes, Discount (%), SubTotal.

The screenshot shows a message log with the following details:

- Buttons: Send message, Log note, Schedule activity.
- Follow button and notification icon (3).
- Date separator: February 23, 2020.
- Message 1:
  - From: YourCompany, Administrator - 2 months ago
  - Subject: Quotation confirmed
  - Content:
    - Customer: China Export
    - Total: 7315
    - Status: Quotation → Sales Order
- Message 2:
  - From: YourCompany, Administrator - 2 months ago
  - Subject: Note by YourCompany, Administrator
  - Content:
    - Total:
    - Status: Quotation
    - Customer: China Export
    - Salesperson: Karel

The screenshot shows a 'Quotations' dashboard with a search bar and a table of quotations. The table has columns for Order number, Order Date, Customer, Salesperson, Total, and Invoice Status.

Order number	Order Date	Customer	Salesperson	Total	Invoice Status
23487F	20/01/2019 13:01:14	Ahmed Reza	Ahmed Reza	4,499.00	To Invoice

ECOM10	20/01/2019 13:01:14	Mathew shawn	Mathew shawn	4,499.00	To Invoice

# ORDERING PROCESS SYSTEM

You can ensure accurate product and order management with minimal effort

## ■ Categorize Products

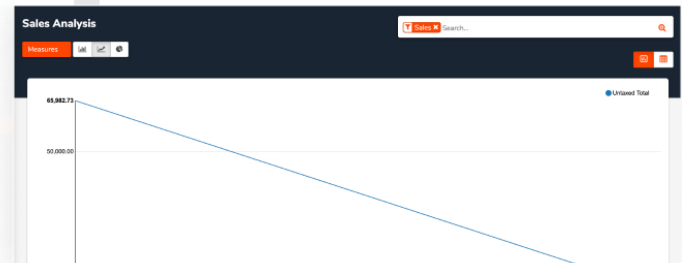

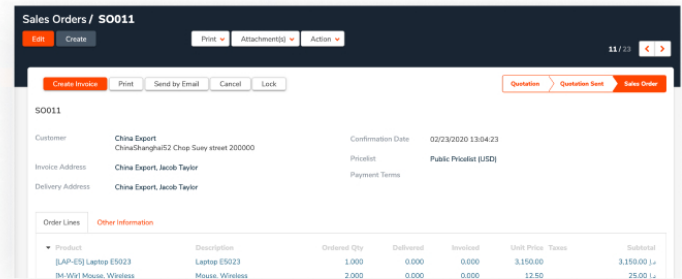

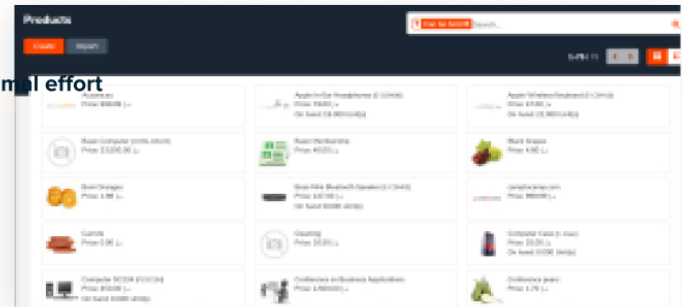

Categorize your products in such a way that it is easy for the potential buyers to choose from the list of products by simply checking in the check box. Simple ways attract the customers and they place orders easily. Selecting and buying should be an easy process.

## ■ Choose Product Templates

Creating a template for each of your products is a great marketing idea. It ensures to keep all the relevant information about a product at one place. You have a good number of options in choosing the template that works best for your business. Moreover, it attracts customers.

## ■ Restrict the Access

Access to the products / services can be restricted. Only the customers who have signed into the portal can have access to your products / services. They have access to them with easy to purchase and payment options. Any authorized person in the organization can have access to it to make changes to the list.

# CONTACT MANAGEMENT

Get all the personal details you need

## ■ Quick review of all appointments

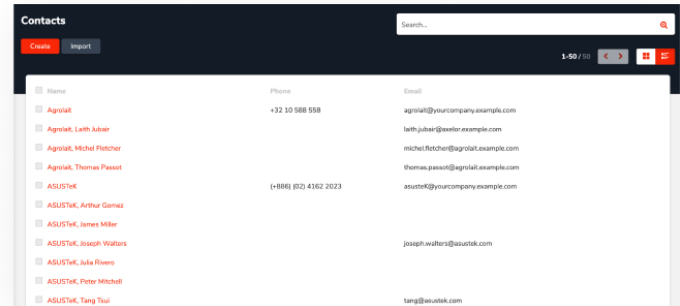

Stay updated on your meetings, forward invitations and other additional information. You can link all these using Google Calendar.

## ■ Quick accessibility of contacts

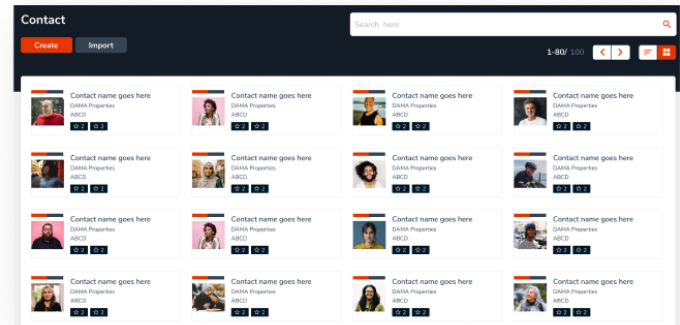

Using a top-grade filter system, you can sort out your needed data within seconds. Using a more systematic concept, you can categorize contacts based on key pointers such as; by company role, by country, or the manager of the account.

## ■ Keep tabs on all business transactions

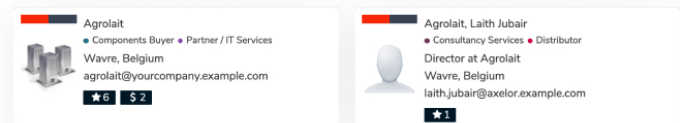

With just a few clicks, you can access all your quotation requests, purchase and sales orders, all for your supplier to your end as a user. Get access to your customer history, including overdue balances and total invoices.

## PRODUCTIVITY

With the ERP solutions, it is **easy to visualize** the entire project along with its multiple processes and systems. Through **interactive graphs and diagrams**, it is easy to know the **progress of the project**, the critical factors, and the different processes it is yet to complete.

# PROJECT MANAGEMENT

## Complete work management project module with relevant tasks

### Forecast the Future Requirements

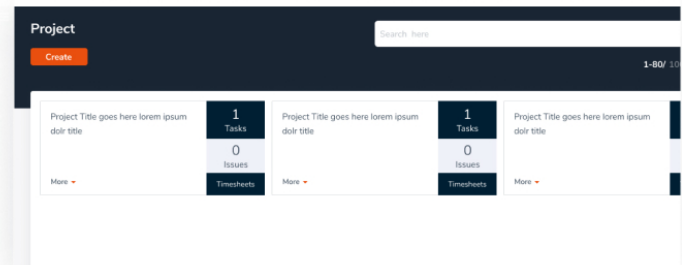

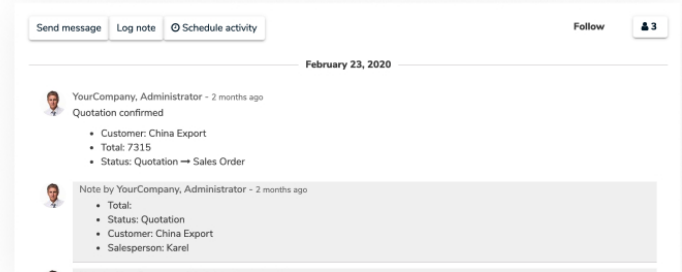

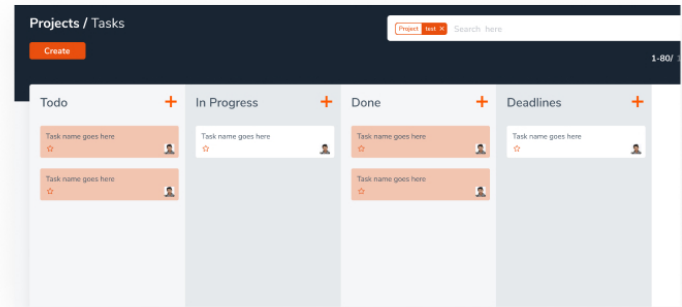

Effective project management depends upon the ability of the leadership in foreseeing the future and predicting things that may happen during the course of the project. Getting ready for the future requirements is a hallmark of effective project manager.

### Anticipate Challenges in Advance

In addition to foreseeing the future requirements, it is essential to anticipate the challenges the project may face in future. Planning in advance for the future challenges ensures project completion within the given time, without any delays and escalation of project costs.

### Coordinate the Team Effectively

Coordinating the workforce is one of the major challenges of a large organization. The software ensures easy coordination of all the stakeholders in a project. Follow up actions are easy to make and unnecessary delays and bottlenecks in communication can be effectively avoided.

# DOCUMENT MANAGEMENT SYSTEM

## ERP takes care of all Your Business Documents at one Place

### ■ Seamless Work

ERP allows your organization to work seamlessly without any bottlenecks. Timely communication of the important updates plays a vital role in building a thriving business. It takes care of all the requirements documentation perfectly.

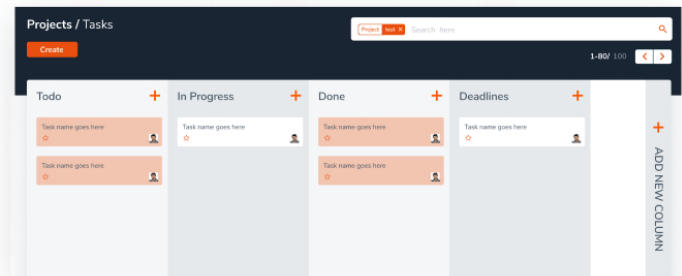

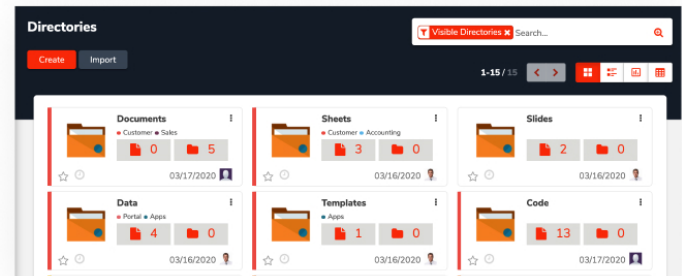

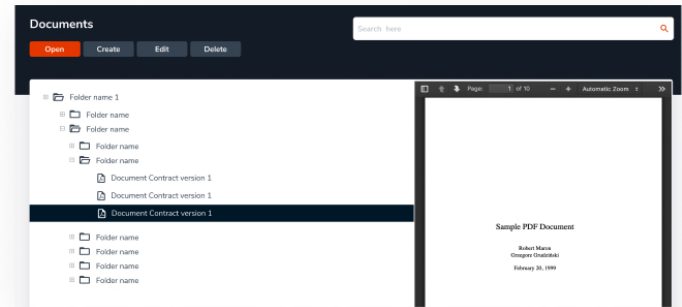

### ■ Sharing Documents

Sharing important documents with your clients and customers has never been so easy. ERP ensures safe and easy sharing of the documents.

### ■ Storing Documents

Keeping the most vital documents in safety is a huge concern of many business organizations. Storing the documents in the electronic format ensures not only greater safety to the document but also immediate access to them whenever necessary.

ERP also ensures separating the documents in batches and storing them in different folders for easy access.

# MEDIA MANAGEMENT

Follow the news and provide your members with feeds

## ■ Share the Latest News/ Blog

Latest happenings in the company and the news related to the company can be shared easily. It is easy to share the latest blog articles of the company with all the employees and the stakeholders.

## ■ Improve the Number of Subscribers

Every business needs effective marketing and visibility in the market for attracting new customers. Maintaining a good rapport with the existing and potential customers plays a key role in improving business.

This screenshot shows a 'New' order form with a top navigation bar containing buttons: 'Send by Email', 'Print', 'Preview', 'Confirm Sale', and 'Cancel'. On the right, there are status buttons: 'Quotation', 'Quotation Sent', and 'Sales Order'. The form fields are organized into two columns: 'Customer' (dropdown), 'Order Date' (11/17/2019 14:55:20), 'Quotation Template' (Default Template), 'Expiration Date' (12/17/2019), 'Pricelist' (dropdown), 'Payment Terms' (dropdown), and 'Delivery Method' (dropdown). Below these fields are three tabs: 'Order lines', 'Suggested Products', and 'Other Information'. At the bottom, a table header is visible with columns: Product, Description, Ordered Qty, Delivered, Invoiced, Unit of Measure, Unit Price, Taxes, Discount (%), and SubTotal.

This screenshot displays an event management dashboard with two event cards. The first card is for a 'New product launch at Headquarters United Arab Emirates' on '15 Jun 2020 12:16 PM', with a deadline of 'To Jun 26, 2020 12:16 PM' and '0 Expected attendees'. The second card is for a 'Second Anniversary' on '8 Jul 2020 12:17 PM', with a deadline of 'To Jul 31, 2020 12:17 PM' and '0 Expected attendees'.

This screenshot shows the details for a 'New product launch at Headquarters' event. At the top, there are buttons for 'Finish Event' and 'Cancel Event', and status buttons for 'Unconfirmed', 'Confirmed', and 'Done'. A summary bar shows '0 Attendees' and an 'Active' status. The event details are as follows: Organizer: YourCompany; Location: YourCompany, 1725 Slough Ave., Scranton PA 18540, United Arab Emirates; Responsible: Tariq; Start Date: 06/15/2020 12:16:59; End Date: 06/26/2020 12:16:59; Timezone: Europe/Brussels; Category: Twitter Hashtag; #; Minimum Attendees: 0; Maximum Attendees: Unlimited.

# MEDIA

Follow the news and provide your members with feeds

## ■ Manage Content Marketing

GO-ERP Blog provides you with the latest content about the business. Blogging about your business is made very easy. With the attractive layout and visuals, you can publish blogs at frequent intervals.

Just complete the space provided for information and drag the visuals and images you like to your blog. Your blog will be ready in a few minutes.

This screenshot shows the 'New' quotation form. At the top, there are buttons for 'Send by Email', 'New', 'Preview', 'Confirm Sale', and 'Cancel'. On the right, there are tabs for 'Quotation', 'Quotation Sent', and 'Sales Order'. The form fields include: Customer (dropdown), Order Date (11/17/2019 14:55:20), Quotation Template (Default Template), Expiration Date (12/17/2019), Pricelist (dropdown), Payment Terms (dropdown), and Delivery Method (dropdown). ## OPERATIONS

With the feature to generate quick reports in GO-ERP, it is easier for **decision makers** to focus on their other important **works productively**. The comprehensive reports make it convenient for the decision makers to identify **the key factors**. **Personalization feature** of GO-ERP allows what **reports or graphs** you want to keep on your dashboard.

# HELPDESK MANAGEMENT SYSTEM

**A comprehensive module for easy resolution of tickets by users**

## ■ User Friendly Interface

It provides a user friendly interface to interact with the customers and business clients.

Making business is made easier with the e-ticket system.

## ■ Provide Help Desk Support

Providing the necessary support for customers improves your business. It is essential to provide all the information for the stakeholders. The help-desk support system provides a ticket number for each enquiry received. A required follow up action is generated and updates the data with the enquiries cleared and the number of pending enquiries.

## ■ Issue Ticket Numbers for Queries

Once the enquiry is successfully answered, it automatically generates the successful completed status of the enquiry along with its ticket number. Thus it facilitates large volumes of questions promptly and efficiently and creates data for future research and development.

## INVENTORY MANAGEMENT

**Using this module, you get to enjoy full-time warehouse orderliness**

### ■ Improved Inventory Processes

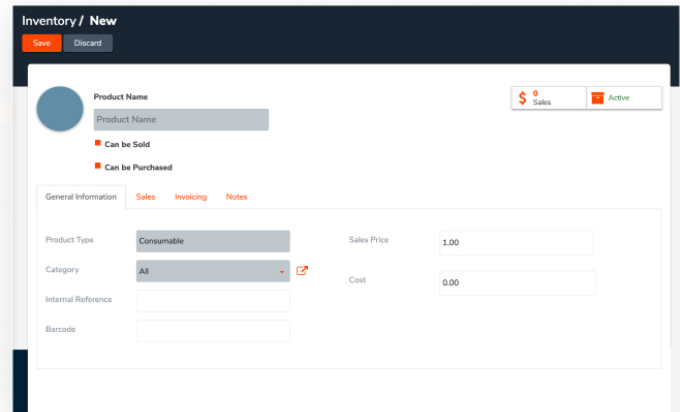

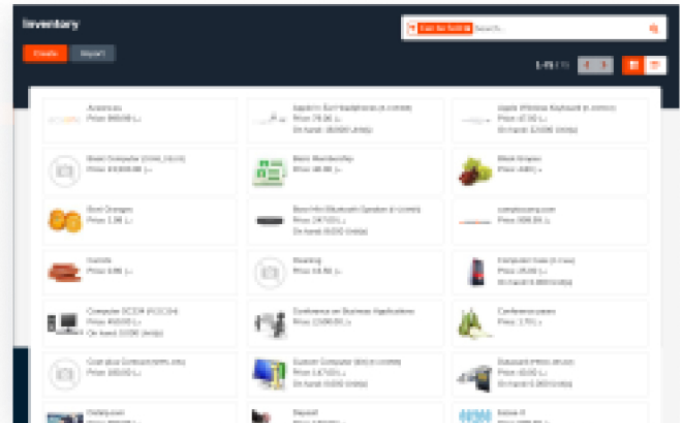

The GO-ERP makes it easy to have the highly effective double entry system for recording the inventory. It helps you with the latest state of the art technology for optimum maintenance of the inventory and stock reports. It facilitates a smart way of accessing and updating the inventory data irrespective of place and time.

## Effective Inventory Management

The GO-ERP Solutions makes it easy to maintain sufficient stock all the time. It avoids unnecessary holding of the stocks beyond the usual requirements. At the same time, it ensures to have minimum stock levels all the time without causing any delays to the production department.

- **Easy Online Tracking**

With the sophisticated GO-ERP, it is easy to monitor every transaction, whether it is sales or purchase. It enables easy tracking of any order anytime that is within the supply chain of your business.

# ORGANIZATIONAL CHART

The Organization enables you to see the hierarchy in the organization in a visual format.

- **Creates the organization chart easily**

Automatically set your organization's workflow chart in an ascending order.

- **Provides options to minimize and to maximize**

Resize your chart with the direction buttons.

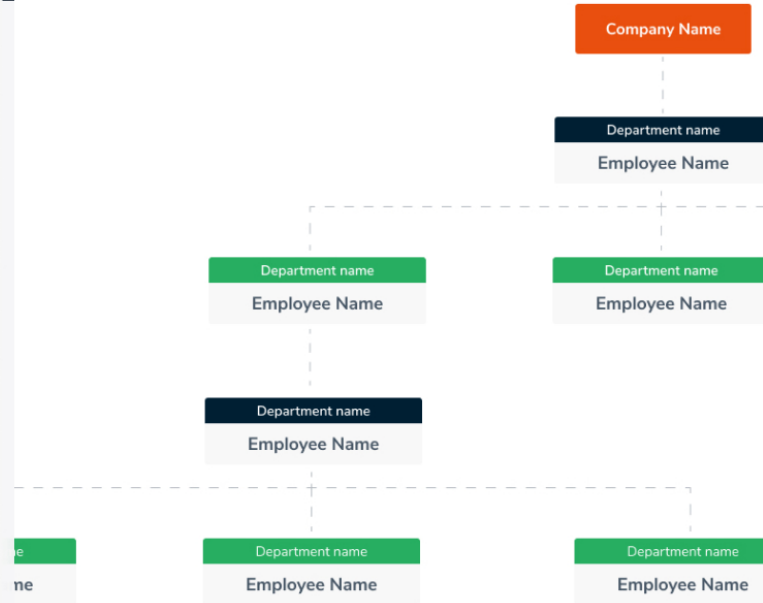

- **Facilitates drag and drop option to understand a particular position**

Just drag node to the required location and drop to confirm the location you selected.

- **Select layout**

Switch between vertical or horizontal structure by pressing buttons.

## Organization Chart

# HUMAN RESOURCE MANAGEMENT

## Fully integrated module for HR request management

### ■ Regular Performance Reviews

Regular performance reviews will motivate the employees to perform better for the growth of the organization.

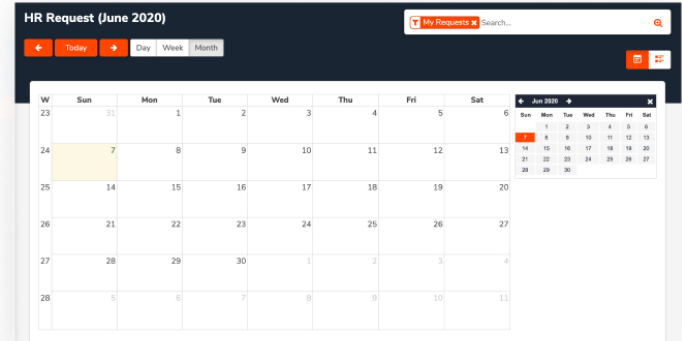

GO-ERP provides you with the updated data at frequent intervals to plan the human resources of your business.

### ■ Regular Surveys to get feedback

Knowing how your workers feel about the processes of the organization plays an important role in making it effective. It facilitates easy customization of the surveys and to get accurate reports. It helps in planning your HR policies for the employees. It also enables you to generate a new survey within a minute by making a few changes to the previous questionnaire.

### ■ Interviews with specific persons

With GO-ERP, it is easy to fix interview appointments with certain people from whom you want specific inputs for decision making. The organization chart provides a clear picture of who has to report to whom. You can also choose specific people to respond to the surveys you have created.

virginie@agrolait.fr - 4:34 PM on

Thanks for the information!

I asked a precise specification to our technical expert. Here is what we precisely need:

- weekly backups, every Monday
- backup time is not a blocking point for us, as we are closed all Monday, leaving time enough to perform the backup
- reliability is very important; we need redundant servers and rollback capacity
- a total capacity of about 2 TB

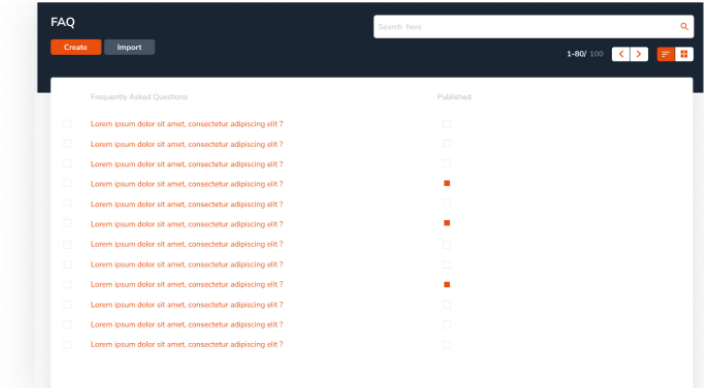

Best regards,

# FAQ

With an active link, you can monitor FAQs as they come in and share them with group members

- Provides a list of frequently asked questions
- Provides an easy interface to ask questions
- Permits a search option for knowing the answer for a particular question
- Categorizes the FAQs
- Provides links for each document for downloading

# EMPLOYEE LEAVE MANAGEMENT

## Employee holiday and leave management module

### ■ Monitor Employee Attendance

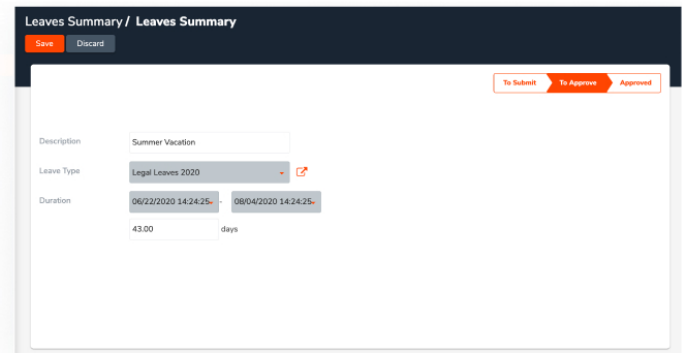

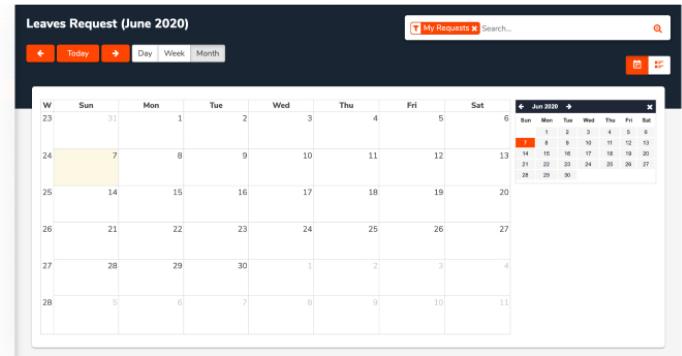

It facilitates easy tracking of the employee attendance and to know who is working and who is on leave on any day.

### ■ Leave Permissions

With a simple mouse click, it is possible to grant permission for leave or decline the same. The system offers lots of flexibility and convenience for monitoring leave management.

### ■ Generate Reports

Tracking the leave records of the employees has never been easier. It generates reports on the employee leaves with the details of leaves availed and available leaves. Employees can apply for leave easily using the system.

# MEETING ROOM

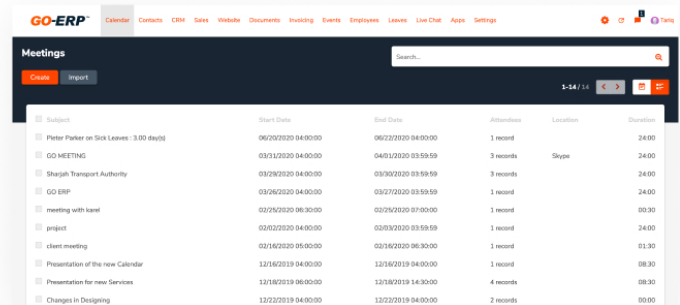

**Manage meeting room; keep tabs on reservations and maintenance**

## ■ Manage reservations

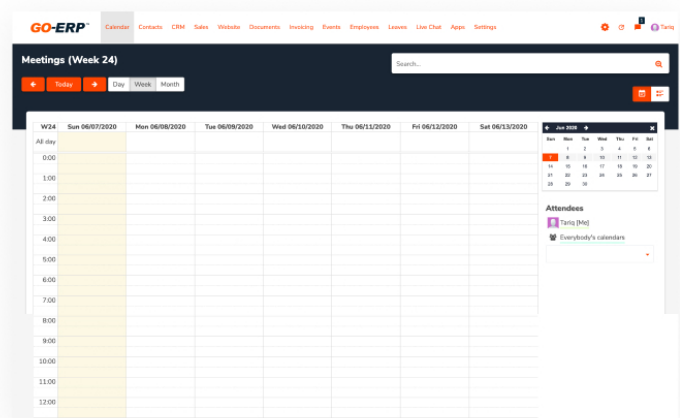

It facilitates the management of every resource of the organization including the Meeting Room. You can easily track the booked slots and the free slots available for conducting meetings.

## ■ Comprehensive Calendar

It facilitates easy integration of your Google Calendar and Gmail. GO-ERP updates all the scheduled meetings with the agenda automatically. It shows the available time slots for giving appointments and doing your work.
